Extended Abstract

1. Introduction
Identify the meaning and semantic connotation is the most important researchers noteworthy issues. Abd-Al-quhir Al-jurjani is among researchers who was attended to this subject. He exhibited the meaning of meaning theory pending on pitching the compilers purpose in knowing the texts meaning. This theory is the reason for distinction between slang and poetic language and added a second meaning to the didactic text. In recent decades structuralism and deconstructisms make the new methods replace text comprehension with reversing this theory. Structuralism know enough text in understanding the meaning and deconstruct surrender understanding the meaning to the reader and introduce the multiplicity study or writer death.

2. Theoretical framework
Each research has a researchical structer and theoretical frame that is researched duration it and after searching the key and formal words the result get earn. It can be said that able to getting significance from the text have the specific position in didactic reserchs and language studie Arabs resercher have done extended researchs about meaning of meaning theory and have added wew appinions to it. Western researchers made basics changes in significance and introduction of two structuralism and deconstructisms.

3. Method
Presen reserch has aim to peruse proces of vicissitude meaning of meaning from the first up to now and three discovering the significance methods existance in text: dominate the

writer's purpose in text (meaning of meaning) structure dominate (structuralism) and
significance unpragmatism (Deconstruct). It can be said this topic is because of
comparative study between this three new theory and hasn't been accomplishments as it up
to now. In continuance will be exhibit a brief explanation about upon three methods.

a) Meaning of meaning: in this method the second and unright significance become
deliberate with standing on metaphor, Allegory and metonymy. This methods has belived
that can discover the main purpose and scompe in the text.

b) Structuralism: in this methode significance understanding without contemplate
historical, social, political and cultural problems contemplate that is dominate on text and
writers days.

c) Decansotructism: in this methodology writer is a person who understand the significance
and currect significance is that reader could understand it. Decanstruct dont give up any worthy
for writer. decanstruct signify the unpragmatism theory with discuss the writer death theory
in which each text is contain thousands significance based on writers undrestand.

4. Consequent and discription the subject
Meaning of meaning is a label that was invented for the first time by Abd-Al-qahir Al-
jurjani ; this theory is pending on gamut pronunciation means metaphor, simile, allegory
and metonymy and practice for the levele after the first significance. Roots of this theory
exist on the thoughtful letters befor Abd-Al-qahir Al-jurjani under the title like "second
significance". Current reviewers use other new terminoloy like: single significance and far
functions insted of meaning of meaning.

5. Conclusion
Significance is an esoteric point in text that three upon isms thoughtful's have tried to
understand it. Meaning of meaning has many diffrences with two structuralism and
deconstructualism as a first significance Try for discovering the meaning in text with two
deconstruct and structuralism isms. This theory know the writer and his purpose understand
significance based in text and has belive to significance twosome in one text ond possibility
to discovering clear significance via understanding writer's purpose , but structuralism and
deconstruct dont give up any prestige for meaning and meaning. Structuralism is based on
text way in knowing significance and deconstruct is stand on writer realization for
discovering text significane and know the writer death theory and unpragmatism
signficance as index for understading available significance in text.
Per this two isms, existance two significance spectrum and create don't have any places in
knowing the meaning come from text.

Keywords: significance, meaning of meaning, Structuralism, Deconstruction,
unpragmatim significance
